

CENTERS FOR PUBLIC HEALTH PREPAREDNESS (CPHP)

Academic Centers form an integral component of the national system to enhance bioterrorism (BT) preparedness and strengthen the nation's public health infrastructure.

- ★ A-CPHP
- ★ A-CPHP and Pre-Event Message Development
- ★ A-CPHP and Specialty Center
- ★ A-CPHP, Specialty Center and Pre-Event Message Development

■ Specialty Centers focus on a topic, professional discipline, core public health competency, practice setting or application of learning technology.

● Advanced Practice Centers were created to develop advanced applications at the community level in three areas of key importance to preparedness for BT and other urgent health threats: integrated communications and information systems across multiple sectors; advanced operational readiness assessment; and comprehensive training and evaluation.
